

Bard® Mesh Flats & Pre-Shapes

The Gold Standard, Monofilament, Polypropylene Mesh

Benefits of the Bard® Mesh Flats & Pre-Shapes Technique:

- Scientifically proven, with more than 40 years of clinical experience
- Safe and ideal for a tension-free hernia repair technique
- Encourages prompt tissue growth
- Strong repair

With more than 40 years of Clinical Experience Bard® Mesh is the Gold Standard.

With *Bard Mesh*, you've got time on your side. Since its introduction in 1962, *Bard Mesh* has been considered the gold standard product to be used in a "tension-free" hernia repair technique. The primary cause for most recurrent hernias is the conventional technique of suturing together tissues that are not normally in apposition, which results in tension^{1,2}. Hernia repair with *Bard Mesh* is a tension-free repair technique that reinforces the weakened area, allowing for tissue ingrowth and resiliency. *Bard Mesh* can be tailored perioperatively and customized to any unique situation. Pre-shaped *Bard Mesh* offers unparalleled convenience, while reducing overall waste and operating time. Because the mesh is pre-shaped, the need to trim the mesh perioperatively is minimized. An optional precut opening fits around the spermatic cord and the rounded edges accommodate to the anatomy of the inguinal canal.

DAVOL

Catalog No.	Description	Quantity	Size
0112640		3/cs.	1" x 4" (2.5cm x 10cm)
0112650		3/cs.	2" x 4" (5cm x 10cm)
